

Connect your Business Email Hosting Reseller Account in WHMCS

In this guide, we will walk you through the steps to connect your Business Email Hosting Reseller Account account within WHMCS. WHMCS is a popular billing and automation platform for web hosting businesses.

Note: You will need a WHMCS license to install WHMCS.

Prerequisites

Before you proceed, make sure you have the following:

1. **Business Email Hosting Reseller Account (DirectAdmin Reseller Account):** Ensure that you have a Business Email Hosting Reseller Account(DirectAdmin Reseller account). If you don't have a Reseller Hosting account and would like to get one, you can view our reseller plans [here](#).
2. **WHMCS Installation:** Ensure you have a working WHMCS installation, you can [Install WHMCS directly through Softaculous with our Web Hosting](#) if you still need to install it.

Steps to Connect your DirectAdmin Reseller Account within WHMCS

Step 1: Activate the DirectAdmin Reseller Module

1. In the WHMCS admin dashboard, navigate to **Setup** and select **Products/Services**.
2. Click on the **Servers** tab.
3. Click on the **“Add New Server”** button.
4. Fill in the required fields, such as:
5. **Name:** Enter a name for the server (e.g., Server 1).
6. **Hostname/IP:** Provide the IP address or hostname of your DirectAdmin server.
7. **Type:** Select **DirectAdmin** from the drop-down menu.
8. **Username/Password:** Enter your DirectAdmin Reseller account’s username and password.
9. **Secure:** Choose **Yes** if you want to use a secure connection (recommended).
10. Click on **Save Changes** to add the server.

Step 2: Configure Product/Service

1. Still in the WHMCS admin dashboard, go to **Setup** and select **Products/Services**.
2. Click on **“Create a New Group”** to create a new product group for your DirectAdmin Reseller services. (e.g., Web Hosting).

Connect your Business Email Hosting Reseller Account in WHMCS

3. Click on **“Create a New Product”** to set up a new product.
4. Fill in the product details, including:
5. **Product Type:** Choose **Hosting Account** from the drop-down menu.
6. **Product Group:** Select the group you created in the previous step.
7. **Module:** Choose **DirectAdmin** from the drop-down menu.
8. **Other configurable options:** Set pricing, billing cycle, etc., as per your requirements.
9. Click on **Save Changes** to create the product.

That is all that is required to connect your Business Email Hosting Reseller Account(DirectAdmin Reseller Account) with WHMCS and add your first email hosting plan.
